Medicaid and managed care with Medicaid in NebrasKare? This bill also calls for looking at other types of areas, CHIP is an example, and some other programs out there, and merging them into managed care. I think, for instance, if CHIP were in there, you would have some savings and we're concerned about the cost of that program in some other areas. We need to look at that. It doesn't say they have to be in managed care, they don't have to be merged in there, but they should be looked at as a part of this review process. And, again, we have some other elements out there that are all interconnecting here, but, in my view, the Legislature needs to have a role, this bill ensures a role for the Legislature and a role for the public and I think that's appropriate. So I would ask your support for the legislation.
